

Increase  
productivity and  
utilization with  
**SkyBitz<sup>®</sup>** and  
**TMWSuite<sup>®</sup>**

## TMWSUITE<sup>®</sup> INTEGRATION

### SMART SOLUTIONS BUILT ON CUTTING EDGE TECHNOLOGY.

Built on cutting-edge technology and customer dedication, SkyBitz<sup>®</sup> has built its reputation as a market leader for remote asset management. Utilizing these industry-leading visibility and management services from SkyBitz, you can assert powerful control over your assets to achieve a more efficient operation at a lower cost. Continuous knowledge of the location and status of unpowered assets anywhere in the world in near real time quickly translates into reduced capital expenses, cost-effective operating efficiencies, increased security and additional customers and revenues.

### TMW AND SKYBITZ INTEGRATION BENEFITS:

Get a complete and accurate picture of your trailers locations and status from within the TMWSuite interface. Integrated information from SkyBitz, will result in better and more informed operational decisions, leading to improved efficiencies and productivity gains throughout your operations. The SkyBitz and TMWSuite integrated solution can help you:

#### Improve dispatcher and planner awareness

Your dispatchers and planners will have access to current and historical trailer locations and status at custom or generic landmarks from TMWSuite and can make more informed decisions in selection and assignment of trailers. Cut out the guess work or incorrect assumptions in status or location of trailers.

#### Get complete visibility to trailer status

Gain access to accurate and timely trailer status information. Utilizing SkyBitz sensor data displayed in TMWSuite, dispatchers will be informed about the motion and load status of trailers. They will know whether the trailer is moving, stopped, loaded and / or empty in addition to its location.

#### Search for trailers at custom landmarks

You can create custom landmarks in TMWSuite to view and search for the location of trailers relative those set perimeters. You will be able to quickly look at a specific trailer yard, terminal or customer location and discover the inventory of trailers and their status. Truly automated yard checks will be available.

#### Search for nearest trailers

With the addition of the accurate location information provided by SkyBitz, you can search for trailers nearest to a city or a custom landmark.

#### Search for idle trailers

Quickly identify idle trailers that may have been dropped at customer locations, trailer yards, etc., that are not being utilized. The ability to quickly search and locate trailers that are idle will allow you to take action resulting in improved asset utilization and overall increased fleet capacity.

## TMWSUITE<sup>®</sup> INTEGRATION

### **Request a position update**

Your operational staff will have the ability to request a location update on trailer assets from TMWSuite.

### **Increase detention billing**

Utilizing trailer location and accurate arrival and departure times, you can recognize opportunities for increased detention billing revenue collection.

### **Improve trailer and cargo security and reduce unauthorized trailer usage**

Improve your ability to react quickly to problem situations through better position tracking visibility and generation of on-demand position updates requested from TMWSuite<sup>®</sup> dispatch. Improve visibility of unplanned stops and out-of-route occurrences for in-transit cargo and reduce lost/stolen cargo. Eliminate trailers being used by customers for unauthorized loads.

### **Reduce capital expense and operational costs**

By improving dispatching operations using SkyBitz, you will increase your fleet capacity without the capital expenses for new trailer purchases & leases, reduce fuel and staffing costs, and ensure optimal operating conditions and efficiency.

## INTEGRATION DETAILS

Critical near real-time data received by TMWSuite<sup>®</sup> from SkyBitz includes:

### **Asset Location**

Historical trailer location data.

### **Sensor Data**

- Trailer Motion Data
- Cargo
- Door

### **Battery Power Status**

Battery status for every Mobile Terminal.
